

OREOLUWA ADEDEJI

Full-Stack Developer · AI Automation Engineer · API Integration Specialist
Lagos, Nigeria · oreoluwarexy15@gmail.com · +2349157734298 · linkedin.com/in/oreoluwa-adedeji-a18316279

✔ Remote-Ready · A sync-First · Open to Global Opportunities

PROFESSIONAL SUMMARY

Versatile engineer and developer with hands-on experience building full-stack web applications, AI-powered automation workflows, REST/Web-hook API integration, and community-driven platforms. Comfortable owning projects end-to-end — from frontend UI through backend logic and third-party integration — in fully remote, a sync environments. Passionate about combining AI tools and modern web tech to deliver real, scalable impact with minimal overhead.

CORE SKILLS & TECHNOLOGIES

Python	JavaScript	TypeScript	HTML/CSS
React.js	Node.js	REST APIs	Webhook Integration
N8n Automation	AI Workflows	Bot Development	CI/CD / Git
Webflow / WordPress	Community Mgmt	No-Code Tools	Data Dashboards

WORK EXPERIENCE

AI Automation & Integration Engineer · Freelance / Remote Projects

2024 – Present · Remote

- ▶ Built N8n-powered automation pipelines connecting REST APIs, Webhooks, and SaaS tools, eliminating repetitive manual tasks for clients across e-commerce and content workflows.
- ▶ Developed Python scripts to automate data collection, processing, and reporting — reducing manual effort by ~80% on recurring tasks.
- ▶ Designed AI chatbot integrations using OpenAI APIs and Webhook triggers, enabling 24/7 automated responses for community platforms.
- ▶ Built a lead-scraping and CRM-sync automation pulling prospect data from LinkedIn and auto-populating HubSpot records via REST API, saving a client 15+ hours/week.
- ▶ Maintained Git-based version control and CI/CD pipelines across all automation projects, ensuring clean and reproducible deployments.

Frontend Developer & Website Builder · Freelance / Remote Clients

2024 – Present · Remote

- ▶ Designed and launched 7+ responsive websites for small business and startup clients using React.js, HTML/CSS, and Webflow — all mobile-optimized and SEO-ready.
- ▶ Integrated Stripe payment APIs, Calendly booking widgets, Mailchimp automations, and live chat into client sites.
- ▶ Delivered projects end-to-end: wireframing in Figma, building in code or Webflow, deploying on Vercel/Netlify, and handing over with full documentation.
- ▶ Built a multi-page real estate listing site with dynamic property filters, Google Maps API integration, and a CRM-connected inquiry form via Webhook.

- ▶ Reduced average client site load time by ~40% through image optimization, lazy loading, and CDN configuration.

Community Manager & Bot Integration Specialist · [Freelance / Discord & Telegram Communities](#)

2023 – Present · Remote

- ▶ Managed and grew 5 online tech communities totalling 5,000+ members across Discord, Telegram, and Slack — handling moderation, onboarding, and engagement.
- ▶ Built custom Discord bots in Discord.js: welcome DMs, role assignment, moderation commands, XP levelling system, and giveaway tools.
- ▶ Set up N8n workflows to auto-post scheduled content, cross-publish announcements across platforms, and alert admins on flagged activity.
- ▶ Grew a community newsletter from 0 to 800+ subscribers in 4 months using Beehiiv.
- ▶ Increased weekly active participation by 40% through structured AMAs, weekly challenges, and pinned resource libraries.

Junior Backend Developer (Contract) · [Remote Startup — Stealth EdTech](#)

Jan 2025 – Jun 2025 · Remote

- ▶ Built and maintained REST API endpoints in Node.js/Express for a learning management system serving 300+ active students.
- ▶ Designed a JWT-based authentication system with role-based access control (student, instructor, admin) and refresh token rotation.
- ▶ Integrated Paystack payment API for course purchases and automated enrollment confirmation emails via SendGrid.
- ▶ Wrote unit and integration tests with Jest, bringing API test coverage from 0% to 74% over the contract period.
- ▶ Collaborated async-first with a 4-person remote team using GitHub PRs, Notion docs, and daily Slack standups.

AI Data Annotation Specialist · [Telus AI](#) · [Appen by Crowdgen](#)

Jan 2024 – Nov 2025 · Remote

- ▶ Annotated and validated large-scale image, text, video, and speech datasets for AI/ML model training across multiple high-profile LLM projects.
- ▶ Led JSON-structured multimodal video dataset annotation for a large language model project (Project Livingstone), aligning visual content with precise textual labels.
- ▶ Defined gold-standard annotation guidelines and conducted quality reviews, maintaining accuracy rates above 98% across all projects.
- ▶ Collaborated asynchronously with international teams across multiple time zones using proprietary annotation platforms (Labelbox, CVAT, Appen tooling).

Biomedical Engineer Apprentice · [University of Ilorin Teaching Hospital](#)

May 2024 – Aug 2025 · Ilorin, Nigeria

- ▶ Implemented Python logging and monitoring dashboards for IT-integrated medical devices, automating anomaly detection and performance tracking.
- ▶ Integrated REST and Webhook APIs for remote device monitoring, enabling real-time status visibility across distributed hospital equipment.
- ▶ Built TypeScript proof-of-concept modules to streamline experimental data workflows, cutting manual data entry time by over 60%.

PROJECTS

SaaS Landing Page & Waitlist Funnel · [Freelance Client](#)

2025 · [React.js](#), [Tailwind CSS](#), [Vercel](#), [Mailchimp API](#)

- ▶ Built a fully responsive SaaS landing page with hero, pricing table, FAQ accordion, and animated feature sections using React and Tailwind CSS.
- ▶ Integrated Mailchimp API to capture waitlist sign-ups and trigger automated welcome email sequences on submission.

- ▶ Deployed on Vercel with custom domain, achieving sub-1s load times and a 95+ Lighthouse performance score.

AI Content Repurposing Automation · [Personal Project](#)

2025 · [N8n](#), [OpenAI API](#), [Webhook](#), [Google Sheets](#), [Buffer API](#)

- ▶ Built an N8n workflow that takes a YouTube transcript via Webhook, sends it to OpenAI to generate Twitter threads, LinkedIn posts, and short-form captions, then schedules them via Buffer API.
- ▶ Reduced content repurposing time from ~2 hours per video to under 3 minutes with zero manual input after setup.
- ▶ Added a Google Sheets logging node to track all generated posts, publish status, and basic engagement metrics.

Discord Community Bot (Multi-Server) · [Personal / Open Source](#)

2025 · [Discord.js](#), [Node.js](#), [MongoDB Atlas](#), [Railway](#)

- ▶ Built a feature-rich Discord bot with welcome DMs, role-based access, moderation commands, XP/levelling, and giveaway system.
- ▶ Persisted user data and server configs in MongoDB Atlas, supporting multi-server deployment without configuration conflicts.
- ▶ Deployed on Railway with auto-restart on crash, achieving 99.7% uptime over 3 months.

WhatsApp AI Customer Support Bot · [Freelance Client — E-commerce Brand](#)

2025 · [Twilio WhatsApp API](#), [OpenAI API](#), [Node.js](#), [Webhook](#)

- ▶ Integrated Twilio's WhatsApp Business API with OpenAI GPT to build a customer support bot that handles order status queries, FAQs, and refund requests automatically.
- ▶ Connected the bot to the client's Shopify store via REST API so it can fetch real-time order data and respond with live shipping updates.
- ▶ Reduced client support ticket volume by ~60% in the first month after launch.

Job Board Web App · [Personal Project](#)

2025 · [React.js](#), [Node.js](#), [Express](#), [PostgreSQL](#), [Render](#)

- ▶ Built a full-stack job board where companies can post remote roles and candidates can filter, bookmark, and apply — with email notifications via SendGrid on new matching listings.
- ▶ Implemented full-text search, tag-based filtering (role type, stack, salary range), and paginated results on the backend with PostgreSQL.
- ▶ Deployed frontend on Vercel and backend API on Render with a shared PostgreSQL database, with zero-downtime deploys via GitHub Actions.

AI Resume Screener & Scoring Tool · [Personal Project](#)

2025 · [Python](#), [OpenAI API](#), [FastAPI](#), [React.js](#)

- ▶ Built a web tool where recruiters paste a job description and upload a resume PDF — the app uses OpenAI to score the match, highlight gaps, and suggest improvements.
- ▶ Backend built with FastAPI exposing a /score endpoint; frontend in React with drag-and-drop PDF upload and an animated scoring dashboard.
- ▶ Added a history log feature storing all past screenings per user session using localStorage and a lightweight SQLite database.

E-commerce Store with AI Product Descriptions · [Freelance Client](#)

2025 · [Webflow](#), [Stripe API](#), [OpenAI API](#), [N8n](#)

- ▶ Built a Webflow e-commerce store with full product catalog, cart, and Stripe checkout integration.
- ▶ Automated AI-generated product descriptions: when a new product is added to the CMS, an N8n workflow fires an OpenAI call and pushes the result back to Webflow via API.
- ▶ Cut product listing time from 20 minutes per item to under 2 minutes, saving the client ~10 hours per week.

Crypto Portfolio Tracker Dashboard · [Personal Project](#)

2024 · [React.js](#), [CoinGecko API](#), [Chart.js](#), [Tailwind CSS](#)

- ▶ Built a real-time crypto portfolio tracker pulling live price data from CoinGecko's free API, with 24h change indicators, portfolio value charts, and watchlist management.
- ▶ Implemented client-side caching to reduce API calls, keeping the app within CoinGecko's free-tier rate limits while maintaining near-real-time data.

- ▶ Fully responsive and deployed on Netlify — used as a frontend portfolio showcase.

Personal Developer Portfolio Website · [Personal Project](#)

2024 · [React.js](#), [Framer Motion](#), [EmailJS](#), [Netlify](#)

- ▶ Designed and built a fully animated developer portfolio with project showcase, skills section, and a working contact form — deployed on Netlify with CI/CD from GitHub.
- ▶ Integrated EmailJS for the contact form to route messages to inbox without a backend server.
- ▶ Implemented dark/light mode toggle, smooth scroll animations via Framer Motion, and lazy-loaded project images.

Pulse Oximeter IoT Prototype · [University of Ilorin](#)

Nov 2025 – Jan 2026 · [Python](#), [Arduino](#), [REST API](#)

- ▶ Prototyped a low-cost PPG-based pulse oximeter measuring BPM and SpO₂ with Arduino and OLED display.
- ▶ Built a Python pipeline to stream sensor readings to a REST API endpoint for remote cloud logging and monitoring.

CERTIFICATIONS & TRAINING

Certification	Issued By	Year
Google AI Essentials	Google (Coursera)	2024
Azure AI Fundamentals (AI-900)	Microsoft	2024
Python for Data Science	IBM / Coursera	2024
REST API Design & Integration	Postman Academy	2024
Git & GitHub Foundations	GitHub	2024
N8n Automation Fundamentals	N8n.io	2025
JavaScript Algorithms & Data Structures	freeCodeCamp	2025
Responsive Web Design	freeCodeCamp	2025
Community Management Essentials	CMX Hub / Udemy	2025

EDUCATION

Bachelor of Engineering (B.Eng), Biomedical Engineering

[University of Ilorin, Nigeria](#) · 2026
